

Scraping Dynamic Web Pages with Python and Selenium

EXPLORING SELENIUM WITH PYTHON

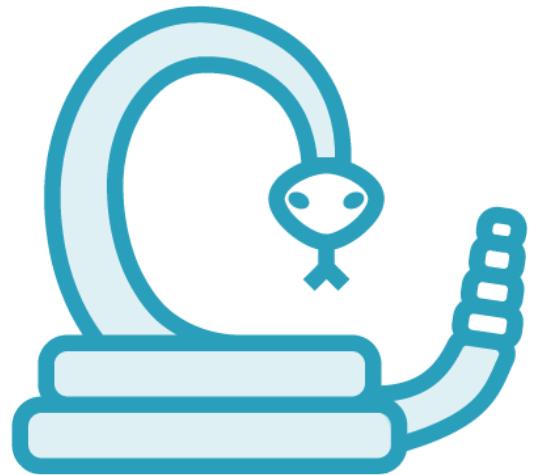

Pratheerth Padman
FREELANCE DATA SCIENTIST

Prerequisites

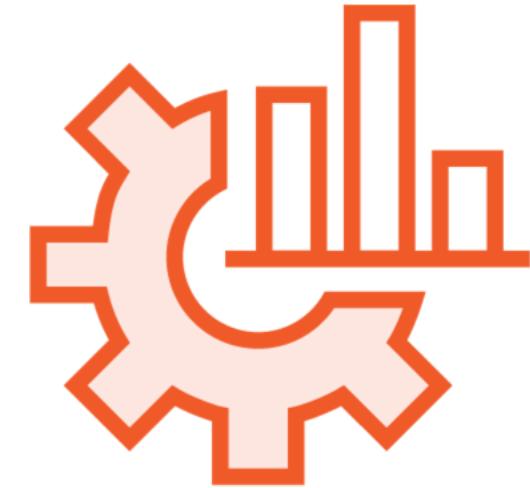

Prerequisites

Python programming

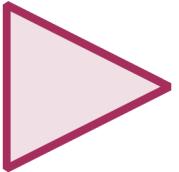

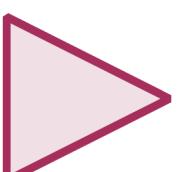

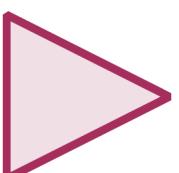

HTML and CSS

Data analytics literacy

Course Pattern

-  | **Concept introduction**
-  | **Concept detailing**
-  | **Practical implementation**

Module Overview

What does scraping dynamic webpages mean?

What is Selenium? Where is it used?

Selenium WebDriver

Demo: Installing required libraries and packages

Demo: Opening a webpage with WebDriver

Overview of Scraping Dynamic Webpages

Web Scraping

Web scraping is the process of extracting information and data from a webpage into a structured format for further analysis.

Types of Webpage Content

Static content

Fixed content. Incapable of action or change.

Dynamic content

Contains dynamically-rendered components and information that changes based on many factors.

What Is Selenium and Where Is It Used?

What is Selenium?

Selenium is a set of tools and libraries that automate web browser actions

Web-driver package to control browser and emulate user oriented actions

Open source

Python, Java, Ruby, Scala, C# etc.

Components of Selenium

Selenium IDE

Used for prototype testing

Selenium RC

First tool of the selenium suite

Selenium WebDriver

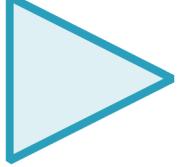

Developed to overcome limitations of
RC

Selenium Grid

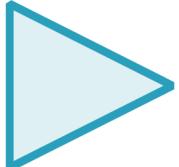

Used for parallel testing

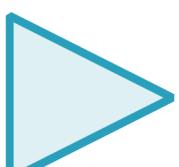

Where Is It Used?

Scripts used to automate any manual user interaction

Automated web application testing

Scraping dynamic web pages

Selenium WebDriver

Selenium WebDriver

**Biggest recent change –
inclusion of WebDriver
API**

**Drives a browser
natively, as a user would**

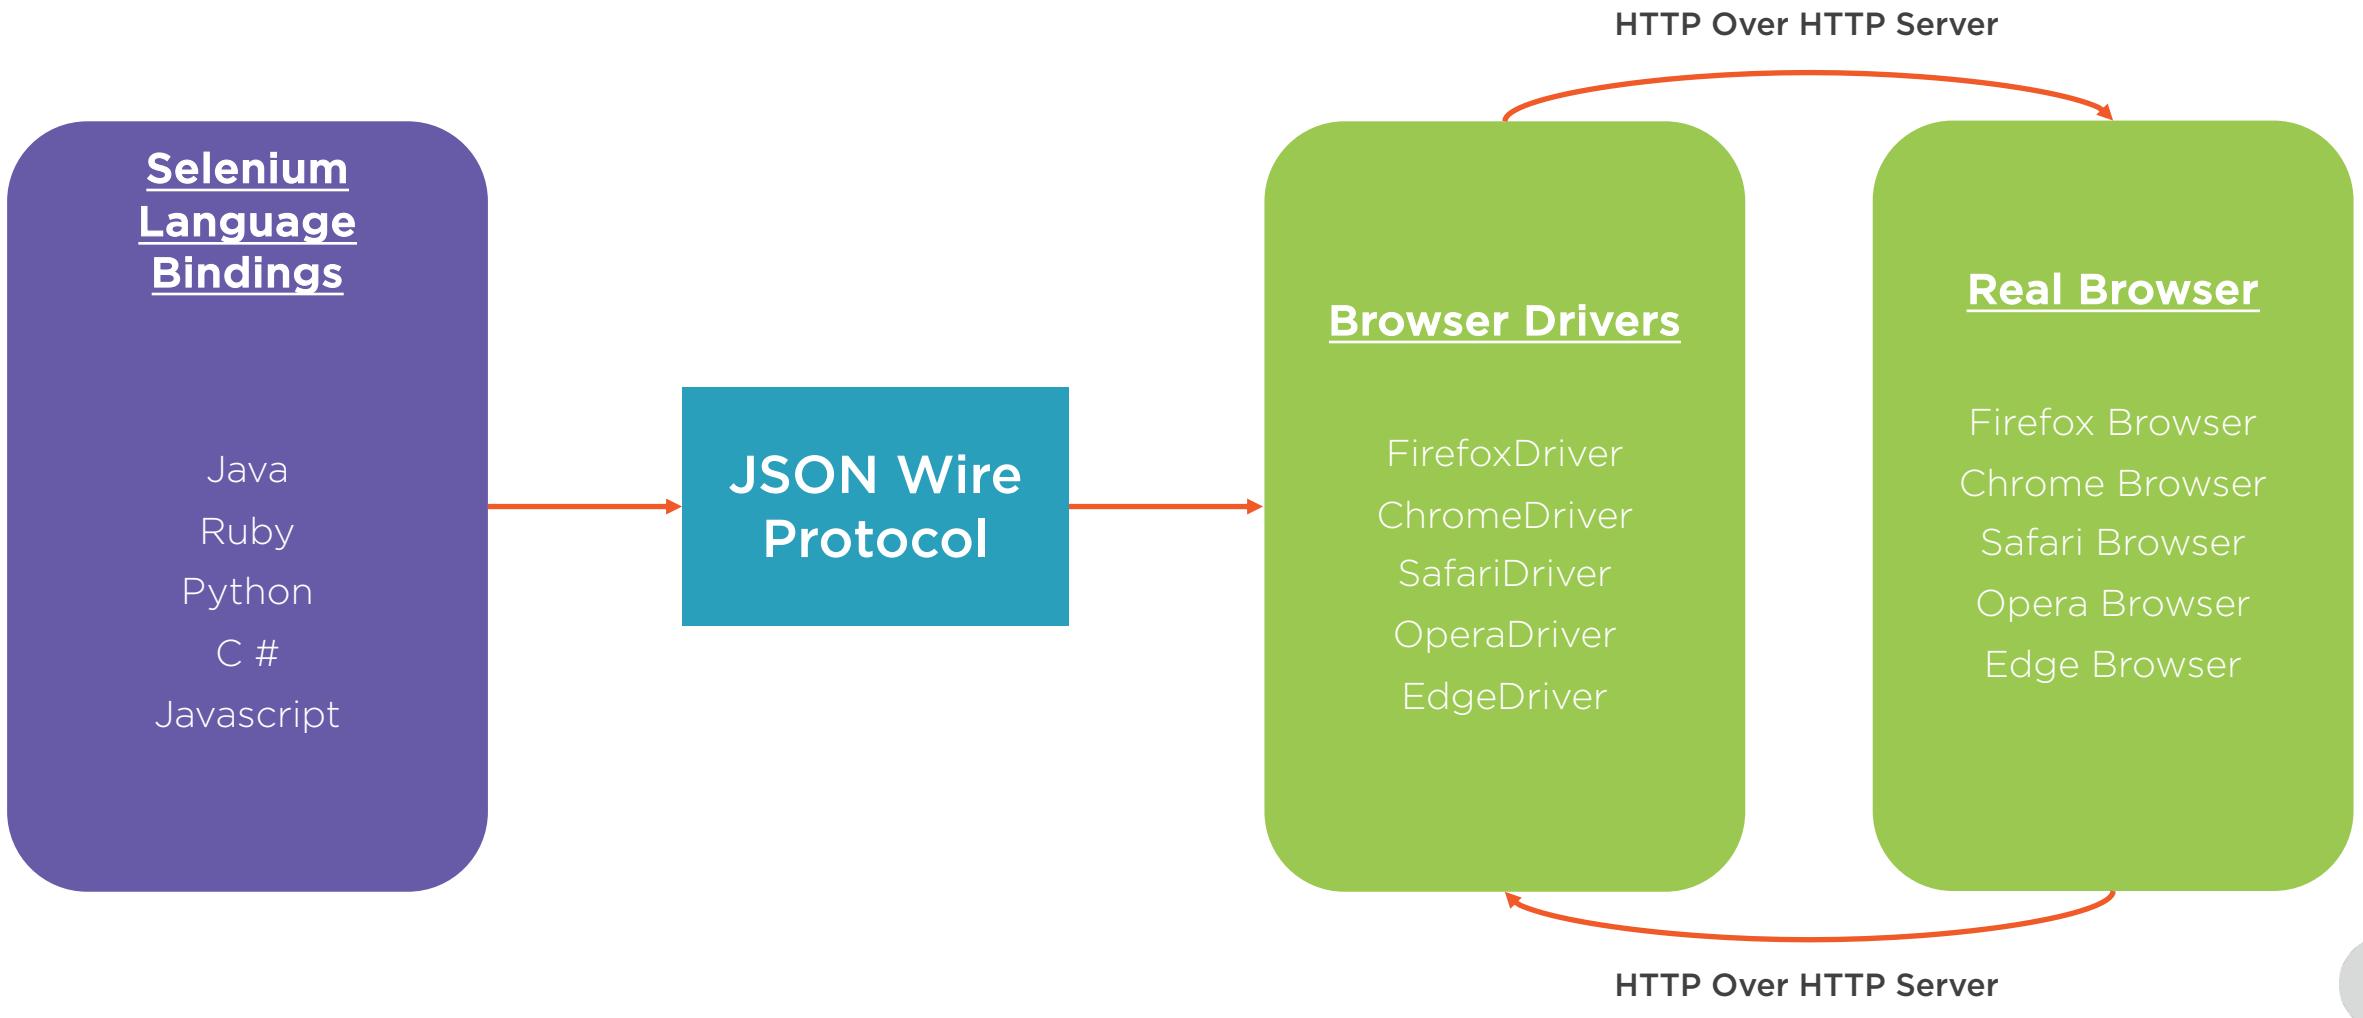

**Selenium 1.0 +
WebDriver = Selenium
2.0**

**Developed to better
support dynamic web
pages**

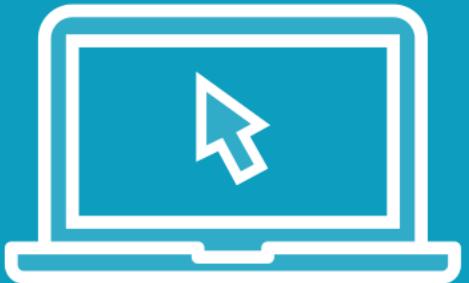

Browser specific classes

Selenium WebDriver Architecture

Demo

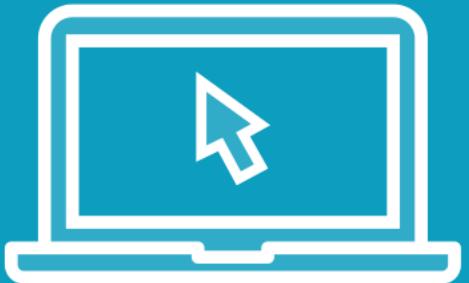

Demo : Installing required libraries and packages

1. Selenium
2. WebDriver
3. Beautiful Soup
4. Jupyter Notebook

Demo

**Demo: Opening a webpage with
WebDriver**

Summary

Overview of web scraping in the context of static and dynamic content

Brief look at Selenium, components and use cases

Went deeper into WebDriver

Installing packages and opening a webpage with WebDriver
